- "Connecting to the world from your couch"

Share of population with mental or substance disorders, male vs. female,

Share of males vs. females with any mental health or substance use disorder; this includes depression, anxiety, bipolar, eating disorders, schizophrenia, alcohol and drug use disorders, and neurodevelopmental disorders. Due to the widespread under-diagnosis, these estimates use a combination of sources, including medical and national records, epidemiological data, survey data, and meta-regression models.
